Good View. Great Feeling.

Rest assured – it's a ResMed mask!

People around the world benefit from ResMed's expertise in mask technology developed over a decade of leadership and innovation.

Mirage Vista brings you the best of **ResMed Mirage Cushion Technology**. The soft, dual-wall cushion reduces pressure on the nasal bridge and maintains seal even when you turn over or move during sleep.

You may be a first-time or an experienced CPAP user.

Whatever your situation, the Mirage Vista gives you the assurance of a ResMed mask with unique new features to improve your treatment.

Caution: In the USA, federal law restricts this device to sale by, or on order of, a physician.

New Mirage Vista™—Good view. Great feeling.

Choosing the right mask is a vital step to successful CPAP therapy. You need a mask that gives you reliable performance along with a pleasant, comfortable experience.

ResMed introduces the Mirage Vista. This unique nasal mask brings you the renowned performance of ResMed masks in an unobtrusive, streamlined design.

A pleasant bedtime story

Mirage Vista eliminates bulky forehead supports. Instead, stability is provided by the unique headgear design. With this revolutionary change, the Mirage Vista allows a clear field of vision and a feeling of freedom.

This also enables you to wear your mask during normal bedtime activities such as watching TV or reading. And if you need to wear glasses, you can. After all, CPAP therapy is meant to enhance your lifestyle, not to disrupt it.

The **One Snap Elbow** makes attachment and detachment of the mask and the air tubing quick and easy. This is especially convenient when you need to visit the rest room at night—just detach the elbow from the mask before you go and snap it on again when you return to bed.

One Snap Elbow

Looks better, feels better

Mirage Vista looks as good as it feels. The streamlined design follows your facial contours and leaves the upper areas of your face open. Doing away with the forehead support means doing away with marks or sores on the forehead too!

Set & Forget Headgear

"**Easy-to-use**" just got easier
Mirage Vista is not just user-friendly; it actually cares for your needs. Just like the **One Snap Elbow**, the **Set & Forget Headgear with Stabilizing Panels** is the first of its kind. Once fitted, it stays fitted—eliminating the need for disassembly and re-adjustment after each use.

Mirage Vista is designed with easy-lock parts and more preassembled parts. Even if your vision is no longer 20/20, or if your fingers aren't quite as nimble as you may want them to be, you will find the Mirage Vista easier to put on, take off, clean, and handle than other masks.

Fit Angle Selector

Watching TV or reading is easy with the Mirage Vista

Comfortable yet stable—a great night's sleep for everyone

Customized comfort & performance

Along with a choice of cushion sizes, Mirage Vista has a **Fit Angle Selector** to provide a customized fit.

This adjustable mechanism offers five mask positions on each side to fit the mask at the angle most comfortable for you. In addition to comfort, a better fit also means better seal and effective performance.
