Reimbursement Fast Facts

This tool will assist you in understanding Medicare coding and coverage for ApneaLink™ devices

The ApneaLink family of products are home sleep test screening and diagnostic devices that can be used as part of a comprehensive protocol to screen and/or diagnose patients with obstructive sleep apnea (OSA), central apneas and mixed apneas, and Cheyne–Stokes respiration (CSR).

### Device Description Potential Coding

<table>
<thead>
<tr>
<th>Device</th>
<th>Description</th>
<th>Potential Coding</th>
</tr>
</thead>
<tbody>
<tr>
<td>ApneaLink Air</td>
<td>Four-channel, Type III HST (measures flow, respiratory effort and, with the addition of oximetry, includes pulse and oxygen saturation)</td>
<td>G0399 or 95806 (coding and classification may vary by payor)</td>
</tr>
<tr>
<td>ApneaLink Plus</td>
<td>Four-channel, Type III HST (measures flow, respiratory effort and, with the addition of oximetry, includes pulse and oxygen saturation)</td>
<td>G0399 or 95806 (coding and classification may vary by payor)</td>
</tr>
<tr>
<td>ApneaLink with oximetry</td>
<td>Three-channel, Type IV home sleep test (HST) (measures flow, pulse, oxygen saturation)</td>
<td>G0400 or 95801 (coding and classification may vary by payor)</td>
</tr>
</tbody>
</table>

### Billing Options

Payor coverage of home sleep tests may vary. Therefore, there are a variety of ways ApneaLink Air, ApneaLink Plus and ApneaLink with oximetry can be billed.

### Screening

What physicians need to know: ApneaLink can be used as a screening device to identify patients with OSA for referrals to in-lab diagnostic testing. There is not a separate and distinct code for screening. Physicians have the discretion to bill an Evaluation and Management code for services provided in a variety of settings, including the physician’s office. If physicians spend additional time with a patient reviewing screening options or results from a screening test, it is up to the physician’s discretion to determine if a higher level Evaluation and Management code is applicable.

**CPT codes 99211-99215 (established patients)**

Description: Evaluation and management services provided in the physician’s office for established patients. Varies based on the type of problems presented and the time spent with the patient.

### Type IV Home Sleep Test

ApneaLink with oximetry can be used with certain payors as a three-channel HST device. Type IV HST devices are often coded as CPT code 95801 and/or HCPCS code G0400. Payors, including Medicare and commercial health plans, may cover CPT code 95801 and/or HCPCS code G0400. Please check with payor policies to verify.

**HCPCS code G0400**

Description: Home sleep test/Type IV portable HST with Type IV portable monitor, unattended; minimum of three channels 2014 National Average Medicare Fee Schedule (subject to change) = paid at discretion of local Medicare contractors

**CPT code 95801**

Description: Sleep study, unattended, minimum of heart rate, oxygen saturation and respiratory analysis (eg, by airflow or peripheral arterial tone)

2014 National Average Medicare Fee Schedule (subject to change) = $95.29 (Technical Component, TC: $45.85; Professional Component: -26: $49.44)

What physicians need to know: ApneaLink with oximetry measures three channels: respiratory flow, pulse rate and oxygen saturation. It is best to check with payors directly to verify if the payor prefers HCPCS code G0400 or CPT code 95801 for Type IV devices.
Type III Home Sleep Test
ApneaLink Air and ApneaLink Plus can be used with certain payors as a Type III, four-channel HST device. Please check with payor policies to verify.

HCPCS code G0399
Description: Home sleep test/Type III portable HST with Type III portable monitor, unattended; minimum of four channels: two respiratory movement/airflow, one ECG/heart rate and one oxygen saturation
2014 National Average Medicare Fee Schedule (subject to change)\(^2\) = $173.02 (TC: $110.69; -26: $62.33)

CPT code 95806
Description: Sleep study, simultaneous recording of ventilation, respiratory effort, ECG or heart rate, and oxygen saturation, unattended by a technologist
2014 National Average Medicare Fee Schedule (subject to change)\(^2\) = $173.02 (TC: $110.69; -26: $62.33)

What physicians need to know: ApneaLink Plus with oximetry measures four channels: respiratory flow, pulse rate, oxygen saturation and respiratory effort. It is best to check with payors directly to verify if the payor prefers HCPCS code G0399 or CPT code 95806 for Type III devices.

Q & A
Q: What other restrictions should physicians be aware of?
Medicare and some commercial payors require that home sleep tests be interpreted by physicians who are board-certified in sleep and/or members of an accredited sleep center. Check payor policies for applicable details.

Q: Which commercial payors cover home sleep testing?
Currently, Aetna, Anthem, Cigna, Humana and United cover home sleep testing in some form with varying restrictions. Payors change policies frequently and may vary by region. Review payor policies for coverage criteria.

Q: Can a patient be sent to a lab for titration following a home sleep test?
There are no current Medicare restrictions on physicians referring patients based on medical necessity to undergo titration in a facility-based setting.

Q: Can a DME conduct a home sleep test?
The Medicare DME MAC LCD policies specifically state that a DME supplier cannot be involved in any aspect of a home sleep test, including, but not limited to, delivery and/or pickup of the device.

Q: What is CPT code 95800?
CPT code 95800 refers to a sleep study, unattended, simultaneous recording: heart rate, oxygen saturation, respiratory analysis (eg, by airflow or peripheral arterial tone) and sleep time. ResMed does not have a device that meets this definition.
