Easily fits them and everyone in between

Finding the right mask fit for a broad range of patients can be challenging. That’s why we created the AirFit™ 20 series – masks that are specially-designed to fit all patients, regardless of facial profile. The AirFit F20 is designed to perform across a wide range of therapy pressures, and fit a remarkable 97% of patients in a recent international fitting study.¹³
Designed specifically for women.

AirFit F20 highlights

Plush headgear
is specifically designed for extra softness and stability.

InfinitySeal™ cushion
provides an effective seal across a wide range of therapy pressures.

Magnetic clips
guide the headgear to the frame quickly and easily.

Soft and flexible frame
sits underneath the eyes and adapts to different facial types, while its integrated padding provides added softness.

Diffused venting
evenly disperses air to dampen air flow and noise out of the mask.

Quick-release elbow
makes it simple to disconnect from the tubing without removing the mask.

AirFit F20 for Her
Designed specifically for women.
ResMed is the #1 mask brand preferred by patients.4

Fitting guide for AirFit F20

1. Start by ensuring the magnets on the lower straps are unclipped.
2. Hold the mask to the face, ensuring the top of the mask is aligned with the top of the nasal bridge.
3. Position the lower straps so they both sit below the ears.
4. Adjust the fastening tabs on the upper straps until the mask feels even and stable.
5. Repeat step 4 with the lower straps.
6. Connect the device’s air tube to the elbow, then click the elbow into the front of the mask.

Additional options

For patients with longer hair, we recommend feeding their hair through the back of the headgear. If tied in a pony tail, it should sit high enough to fit comfortably through the back of the headgear.

Refer to the user guide for further instructions and complete labeling information including indications, contraindications, warnings and precautions.
