Fitting Guide for AirFit P10

1. Hold the pillows at your nose, ensuring that the pillow size indicator is on the bottom and you can see the left (L) and right (R) orientation indicators.
2. Stretch the lower strap around the back of your head.
3. The top strap should sit comfortably on top of your head.
4. Pull the headgear over your head by holding the lower strap.
5. Stretch the lower strap around the back of your head.
6. The top strap should sit comfortably on top of your head.
7. Hold the pillows at your nose, ensuring that the pillow size indicator is on the bottom and you can see the left (L) and right (R) orientation indicators.
8. Pull the headgear over your head by holding the lower strap.
9. Ensure the nasal pillows fit securely into your nostrils with both pillows positioned upright.
10. Finally, connect the end of the mask’s tube into your device’s air tubing.
11. Ensure the nasal pillows fit securely into your nostrils with both pillows positioned upright.
12. Turn on your device — your mask is now ready to use.
13. Move the mask away from your face, and then place it back again.
14. Ensure the nasal pillows fit securely into your nostrils with both pillows positioned upright.

Note: For complete user instructions, refer to the AirFit P10 User Guide.

A quieter mask to fit your sleep.

The AirFit™ P10 nasal pillows mask is part of ResMed’s new AirFit series—the right fit for you. This is our quietest mask yet, offering the reliability and performance of the Swift™ FX in a design that’s approximately 50% lighter and 50% quieter.¹ A study also found that patients using the AirFit P10 slept more than 40 minutes longer per night.²

Quieter
QuietAir™ woven-mesh vent technology makes this ResMed’s quietest mask yet, promoting patient acceptance.

Lighter
50% lighter than our most popular nasal pillows mask¹, offering patients the comfort of a better night’s sleep.

Easier to Use
Key-clip nasal pillows feature color-coded sizing and left/right orientation for fast and easy fitting.

¹Declared dual-numbered noise emission values (with uncertainty 3dBA) in accordance with ISO 4871.

More than 40 minutes of extra sleep, every night

In a recent clinical study, we found that patients slept more than 40 minutes longer per night when using the ResMed AirFit P10. That’s almost five hours per week of additional sleep, helping ensure your patients will stay compliant with their sleep therapy.

AirFit P10 Features and Benefits

- **Dual-wall technology** with triangular airflow seals on contact, dispersing air gently to the nose.
- **QuickFit™ elastic headgear** with unique split-strap design provides stability and adjustability with minimal facial contact.
- **Key-clip nasal pillows** offer effortless assembly, with color coding for easy sizing and left/right orientation to ensure patients fit the mask properly.
- **Innovative flexible tube** is ultra light and flexible yet highly durable, offering patients full freedom of movement without compromising seal.
- **QuietAir woven-mesh venting** quietly directs exhaled air, so it’s barely noticeable to patients and their bed partners.
- **The AirFit P10 for Her** is designed especially for women, offering a smaller size designed for female facial contours, along with stylish tones and highlights.
- **Dual-wall technology** with unique split-strap design provides stability and adjustability with minimal facial contact.

AirFit P10 Components

- **Frame system** (includes frame and pillows):
