ResMed AirFit™ P30i offers a nasal pillows cushion option for patients who prefer a top-of-the-head tube design. Just like AirFit N30i, it features a SpringFit frame designed to adapt to each patient’s face and only two frame sizes, which streamlines fitting and SKU management.

**AirFit P30i highlights**

- **Quick-release elbow** allows for easy disconnection. The pinch-clip elbow stays attached to the tubing to ensure parts do not get stuck or lost.

- **SpringFit frame** automatically adjusts to different facial profiles, helping provide an accurate fit the first time.

- **Nasal pillows cushion** is interchangeable with AirFit N30i nasal cradle cushion.

- **Soft sleeves** designed for added comfort and reduction in facial marks.

- **Top-of-head design** gives patients the freedom to sleep in any position and closer to their bed partner.

- **QuietAir™ vent** breaks up exhaled air for a quiet experience that is less disruptive to the bed partner.

- **SpringFit frame** automatically adjusts to different facial profiles, helping provide an accurate fit the first time.

- **Quick-release elbow** allows for easy disconnection. The pinch-clip elbow stays attached to the tubing to ensure parts do not get stuck or lost.

- **Soft sleeves** designed for added comfort and reduction in facial marks.
AirFit P30i vs. DreamWear Gel Pillows

In a recent study, a majority of patients preferred AirFit P30i to DreamWear™ Gel Pillows for overall performance. Of those with a preference, more than 70% found that it sealed better and 66% found it easier to use.\(^1\)
Fitting guide for AirFit P30i

1. Pull the frame and headgear over the head until the elbow is positioned on top and the headgear is behind the head.
2. Place the cushion under the nose and align the pillows into the nostrils.
3. Tighten or loosen the headgear until the cushion fits comfortably under the nose.
4. Squeeze the side buttons on the elbow and detach from the frame. Connect the air tubing from the device to the elbow, then reattach to the frame.

Additional options
For patients with longer hair, we recommend feeding their hair through the back of the headgear. If tied in a pony tail, it should sit high enough to fit comfortably through the back of the headgear.

Refer to the user guide for further instructions and complete labeling information including indications, contraindications, warnings and precautions.
